www.tomplan.co.uk Proposal: The proposal seeks to convert the first-floor and attic space above a ground-floor takeaway restaurant into self-contained flat accommodation. The works include internal modifications to achieve suitable ceiling heights and installing new composite doors to provide independent access, maintaining visual consistency with the building's existing facade.

Existing and Proposed Dimensions: Ground Floor: Currently occupied by a takeaway restaurant with a Gross Internal Area (GIA) of approximately 45.75m².

Basement: Used as ancillary restaurant storage, having a GIA of approximately 46.60m². First Floor: The existing area is approximately 38.05m².

Proposed works will reconfigure this floor to provide: Entrance Hall: 4.16m² Landing: 5.24m² Bathroom: 3.46m² Living Room: 11.23m² Kitchen: 7.08m² Dining Room: 10.65m² Storage: 2.80m² Total First Floor GIA: 44.62m²

Attic Floor: Currently limited in headroom with a GIA of 23.25m². Proposed alterations will convert this into habitable space, achieving the required ceiling heights by:

Lowering the existing attic floor. Lowering the first-floor ceiling to utilise the existing 500mm void space between the first floor and attic.

The proposed attic conversion will provide the following: Attic Bedroom: 12.54m² Walk-in wardrobe: 6.23m² En-suite: 2.14m² Total Attic Floor GIA: 20.91m² Combined Proposal self-contained flat Total GIA (First Floor + Attic): 65.53m² Tomplan Planning Service

www.tomplan.co.uk Design Considerations: The site lies within an Article 4 Direction and designated Conservation Area. The building's external facade will remain largely unchanged, thereby respecting the area's historical and visual integrity. The proposal includes installing new composite doors, coloured to match the existing window frames, which requires minimal external alterations. This ensures the visual appearance remains consistent and enhances the streetscape without detracting from its heritage value. Installing new composite doors, coloured to match the existing window frames, requires minimal external alterations. Ensures the visual appearance remains consistent and enhances the streetscape without detracting from its heritage value. Structural modifications to floors and ceilings will ensure compliance with building regulations, providing adequate headroom and creating comfortable living spaces.

Access and Parking: Independent residential access will be created via the installation of new composite doors. Existing attached parking spaces at the rear of the property will provide adequate parking provision, complying with local parking standards and policy.

Planning Policy Compliance: The proposal is compliant with relevant local policies, as it: National Planning Policy Framework (NPPF) <redacted_date>: The proposal complies with paragraph 120, emphasising the effective use of land by converting existing underutilised buildings into residential accommodation. Additionally, paragraph 197 highlights that developments within conservation areas must preserve or enhance the historic environment, which this proposal achieves by minimising external alterations.

Doncaster Local Plan <redacted_date>-<redacted_date>: The development aligns with Policy ENV25 (Conservation Areas), ensuring that alterations respect the area's unique architectural and historical character. Furthermore, it complies with Policy DEV5 (Design and Amenity), which requires developments to maintain high standards of design and amenity, ensuring compatibility with surrounding uses and safeguarding residential amenity.

The proposal aligns with national and local planning policies by maintaining the conservation area's character and appearance, providing high-quality residential accommodation within a sustainable town centre location, and effectively utilising existing spaces without negatively impacting neighbouring properties.

Maintains the character and appearance of the conservation area. Provides high-quality residential accommodation within a sustainable town centre location. Minimises external alterations to preserve the building's heritage. Utilises existing unused spaces effectively to meet housing demand without negatively impacting neighbouring properties or amenities. Tomplan Planning Service

Architectural Drawing Service Submitted to Council to accompany an application. <redacted_date> www.tomplan.co.uk The proposal aligns with the local authority's objectives to enhance and sustainably develop town centre living. It contributes positively to the local housing stock while preserving Doncaster's built heritage.

Conclusion: This proposed development enhances existing underutilised space, respects the historic environment of the conservation area, and complies fully with local planning policy, providing much-needed residential accommodation in a central location. This application has been carefully designed to align with both local and national planning policies and makes effective use of currently underutilised space, significantly enhancing its value and usability. The proposed alterations are internal and involve structural modifications that have been thoughtfully planned to respect the building's existing form and structural integrity. External changes are minimal and primarily consist of new composite doors, specifically chosen to match existing window frames, ensuring that visual coherence and the heritage value of the conservation area are fully maintained.

This conversion aligns seamlessly with the objectives outlined in the National Planning Policy Framework (<redacted_date>), to promote development within conservation areas that preserves or enhances their historical significance.

Locally, this application strongly supports the Doncaster Local Plan <redacted_date>-<redacted_date>, particularly Policy ENV25, by respecting and preserving the conservation area's distinct architectural and historical qualities. Furthermore, it complies with Policy DEV5, guaranteeing a high standard of design and residential amenity that complements the surrounding town centre environment.

In addition to meeting policy criteria, the development provides independent access and adequate parking spaces, addressing practical considerations and ensuring minimal disruption to neighbouring properties and the local community. This thoughtful proposal will significantly contribute to Doncaster's residential housing stock, enhancing the local community and economy without compromising the area's historical character.

I kindly request that the Council grant approval for this beneficial and well-considered development proposal.
