PLANNING CONSULTATION RESPONSE Application No 92.73914.FUL Proposal Erection of detached dwelling and garage following previous demolition of original dwelling Address 22 Market Lane, Bessacarr, Doncaster, ZZ29 6EP Consultee Date Ecology Comments: Louisa Molloy <redacted_date> Consultation Comments: Dear Paul, Thank you for consulting me on this application. Having reviewed the application I can see that the existing dwelling has already been demolished and the site somewhat prepared for the new dwelling. The garden is well managed and contains limited vegetation, and the plans show that all existing trees and boundary vegetation will be retained, therefore I have no concerns that protected and notable species or habitats will be impacted by proposals. The application is also exempt from mandatory BNG as it is a self-build development. The site is however in a suburban area with a high proportion of tree cover. Therefore, enhancements for roosting bats and nesting birds would be appropriate and in accordance with Local Plan policy 29 which states: Policy 29: Ecological Networks (Strategic Policy) Proposals will only be supported which deliver a net gain for biodiversity and protect, create, maintain and enhance the Borough's ecological networks by: A) being of an appropriate size, scale and type in relation to their location within and impact on the ecological network; B) maintaining, strengthening and bridging gaps in existing habitat networks; C) planting native species and creating new, or restoring existing, national and local priority habitats and/or species; and D) working with strategic partnerships to deliver conservation projects at a landscape scale where appropriate. Part C) of the policy is most applicable to this application and I propose a condition that provides opportunities for roosting bats and swifts. To conclude I have no ecological objections to the proposals, and if you are minded to grant approval please can you ensure the condition below is included with the permission. Kind regards, <redacted_name> Consultation Conditions: Within one month of commencement of development, an Ecological Enhancement Plan (EEP) shall be submitted to the local planning authority for approval in writing. This plan shall include details of the following measures, all of which shall be implemented prior to the first occupation of the site or an alternative timescale to be approved in writing with the local planning authority. ■ One integrated bat box of the Vivara Pro Woodstone type or similar to be positioned on a south facing elevation, at least 4 metres from the ground, and away from artificial light. ■ Two integrated swift bricks of the Vivara Pro Woodstone type or similar to be positioned on a north facing elevation, at least 4 metres from the ground, and not above doors or windows. REASON

To ensure the ecological interests of the site are maintained in accordance with Local Plan policy 29.
