

Consultation Reply Pollution Control

PLANNING CONSULTATION RESPONSE Application No 92.73914.FUL Proposal Erection of detached dwelling and garage following previous demolition of original dwelling Address 22 Market Lane, Bessacarr, Doncaster, ZZ29 6EP Consultee Pollution Control – con land GAP <redacted_date> Consultation assessment and justification: Assessment: As this development is for a sensitive end use, an appropriate contaminated land risk assessment should be carried out, in accordance with Government Planning Guidance and the Yorkshire & Lincolnshire Pollution Advisory Group (YALPAG) Developers guide. The Developers guide has been adopted by over 30 LA's in the region, including Doncaster and can be found on the Doncaster Council Website. www.doncaster.gov.uk/services/environmental/developing-on-contaminated-land Without an appropriate risk assessment, the concern would be that future site users, i.e. young children, could be exposed to "unacceptable levels" of contaminated soils on a daily basis. Young children in particular are more vulnerable to contamination, due to their low body weights, the nature of playing, and their frequent use of the garden. Crawling is associated with high dermal and inhalation exposure, while the high frequency of hand to mouth actions in children results in high soil ingestion. Furthermore, our historic maps show the above application is located 60m from a sand pit, which has the potential to of been infilled with waste. This should be considered further in the required risk assessment. In light of the above it is strongly recommended any favourable planning permission should have CON 1 and CON 3 attached. Justification: To secure the satisfactory development of the site in terms of human health and the wider environment, in accordance with the National Planning Policy Framework and Doncaster's Local Plan Policy 54 & 55. Consultation Conditions: Contaminated Land - CON 1 and CON 3
