

Consultation Reply Tree Officer

PLANNING CONSULTATION RESPONSE Application No 92.73914.FUL Proposal Erection of detached dwelling and garage following previous demolition of original dwelling Address 22 Market Lane, Bessacarr, Doncaster, ZZ29 6EP Date of Consultation Reply <redacted_date> Consultee Tree Officer - Andrea Brocklebank Consultation Assessment and Justification: Thank you for consulting on this application. There is a TPO tree immediately adjacent to and affecting the site. The arboricultural information submitted on this application gives an indication of the location, size, condition of trees, and the root protections required around them in line with BDS5837:<redacted_date>. What information is missing, is an overlay of the proposed dwelling onto the arboricultural information to give indications as to whether the proposal is within these root protection areas, (which I believe it may be) and where this occurs what mitigation measures and methods will be used to prevent damage. There is a requirement for an Arboricultural Impact Assessment, which should show the location and method statements of the protection fencing (in line with BS5837:<redacted_date>), any mitigations for any root protection areas have been compromised, and where the locations of plant and materials will be placed on the site away from the trees. This information should be submitted and agreed as reasonable prior to any decision on the application to ensure that the trees not unduly affected, and should preferably not be left as a condition. Consultation Conditions 1. CONDITION (Tree protection) Prior to the commencement of the development hereby granted a scheme for the protection of the root protection areas of all trees shown for retention on the approved plan that complies with clause 6.2 of British Standard 5837:<redacted_date> Trees in Relation to Design, Demolition and Construction - Recommendations shall be submitted to and approved in writing by the Local Planning Authority. Tree protection shall be implemented on site in accordance with the approved details and the local planning authority notified of implementation to approve the setting out of the tree protection scheme before any equipment, machinery or materials have been brought on to site for the purposes of the development. Thereafter, all tree protection shall be maintained in full accordance with the approved details until all equipment, machinery and surplus materials have been removed from the site, unless the local planning authority gives its written approval to any variation. Nothing shall be stored or placed in any area fenced in accordance with this condition and the ground levels within those areas shall not be altered, nor shall any excavation be made, without the written consent of the Local Planning Authority. REASON: To ensure that all trees are protected from damage during construction in accordance with Local Plan Policy 32. CONDITION (Tree Survey) Prior to the commencement of any development, the applicant shall submit a detailed Tree Survey in accordance with BS5837:<redacted_date> guidelines. This survey must include a Tree Protection Plan (TPP) and an Arboricultural Impact Assessment (AIA) to allow for a thorough evaluation of the proposed development's impact on existing trees. REASON: To ensure that the trees on and adjacent to the site are adequately protected and managed during and after the development process. This is in accordance with BS5837:<redacted_date>, which provides a framework for the assessment and management of trees in relation to construction. The TPP and AIA will help identify the necessary measures to protect tree health and structural integrity, thereby preserving the environmental and aesthetic value of the site.
