

Design And Access Statement

PROPOSED ERECTION OF DETACHED DWELLING AND GARAGE FOLLOWING PREVIOUS DEMOLITION OF ORIGINAL DWELLING: 22 Market Lane, Bessacarr, Doncaster, ZZ29 6EP DESIGN AND ACCESS STATEMENT The proposal involves the erection of a detached two storey dwelling and garage to replace the previous dwelling that existed on the same site that has now been demolished. The application site is located within the Residential Policy Area of the Adopted Doncaster Local Plan and is surrounded on three sides by existing residential development with a petrol filling station on the fourth side that faces onto the main Bawtry Road. The site was the subject of two previous planning applications for the erection of two detached dwellings. Both applications were refused on grounds of "over development" and in the report that accompanied the decision to refuse permission it confirmed support for the erection of a single new dwelling to replace the one that had been demolished. The site is located within the Residential Policy Area of the Adopted Doncaster Local Plan wherein further residential development acceptable as a matter of principle subject to compliance with the Councils normal Development Management requirements. These requirements include issues of access, parking, design, privacy and amenity for example. The design of the proposed dwelling will ensure that there is no adverse impact on the amenity and privacy of the surrounding dwellings and provide more than the minimum requirement for private rear amenity space. Any windows over looking the adjacent dwelling will be obscure glazed. A double garage will be provided that will ensure that there will be sufficient car parking to serve the residents and visitors of and to the proposed dwelling. The proposed dwelling is not particularly dissimilar to the dwelling that was demolished in terms of it being two storeys in height with a roughly L shaped footprint including a front projection that incorporates a double garage. The materials will be brick and tile which is typical of the surrounding area and nearby dwellings. A tree which is the subject of a Tree Preservation Order is located at the front of the site and the proposed new dwelling will have no greater impact on the future of the tree than the original dwelling. The application site is within the Environment Agencies Flood Zone 1 and therefore is at the least risk of flooding. The location within Bessacarr which is one of the suburbs of Doncaster ensures that it is in a highly sustainable location with easy and convenient access to both local and town centre services.
