

Flood Risk Assessment

Flood Risk Assessment Page 1 FLOOD RISK ASSESSMENT

Proposal: Change of Use of first floor from Use Class C3 (residential) to Use Class F2 (Local Community Uses)

Location: The Meeting House, 42 Brook Street, Hexthorpe, Doncaster, ZZ46 0BG

Assessment: This is an application for change of use of the first floor only at the Property from existing residential use (Use Class C3) to use as part of the existing community centre (Use Class F2). Some internal alterations are proposed to the first floor, effectively merging two of the existing units into meeting space and associated areas. No changes are proposed for the ground floor or car park (existing community use) or any of the external elevations, boundaries and areas. The Property as a whole has the following assessments on the <redacted_url> flood risk website:

■ Yearly Chance of Flooding by Surface Water – VERY LOW ■ Yearly Chance of Flooding between <redacted_date> and <redacted_date> – VERY LOW ■ Yearly Change of Flooding from Rivers and Sea – VERY LOW ■ This location is outside of a groundwater flood alert area ■ Flooding from reservoirs is unlikely in this area

There is no watercourse in the immediate area with the nearest being the River Don around 0.3 miles to the north. Equally, there is no local history of any flooding in the area.

Given the above, it is considered that there is an existing very low likelihood of flooding from any source at the Property. This is further reduced considering that the application is for the first floor only and for a change of use only. .
