PLANNING STATEMENT

Erection of storage barn

Roseacre House, Barnby Dun, Doncaster, ZZ38 5BX

<redacted_date>

Prepared by <redacted_name>

CONTENTS 1. INTRODUCTION 2. THE PROPOSAL 3. SITE LOCATION 4. DESIGN 5. RESIDENTIAL AMENITY 6. FLOOD RISK 7. PLANNING POLICY 8. JUSTIFICATION 9. CONCLUSION 1.0 INTRODUCTION

Mark Simmonds Planning Services Ltd have been instructed to prepare and submit a proposal for the erection of a storage barn to be built as a facsimile of a storage barn recently demolished on the site. 2.0 SITE DESCRIPTION The application site is a field/paddock off Tranmoor Lane, Barnby Dun. The wider site is grassed but the siting of the storage barn will be on the previous barn's exact footprint and no habitats or grassland will be affected 3.0 THE PROPOSAL This application proposes the erection of a storage barn which is in keeping with the locality and that that is exactly the same size and dimensions as the building that sat there until very recently.

Final materials for facing/finishing can be conditioned. 4.0 SITE LOCATION The application site is located just outside of the defined Settlement Boundary and is situated off Roseacre House, Barnby Dun, Doncaster, ZZ38 5BX. To the north, south and west of the site are agricultural and other small farm buildings and to the east is Tranmore Bungalow and Chaiquinta Pet Hotel. 3

5.0 DESIGN

The proposed new storage barn has been located within the site on exactly the same footprint as the previously demolished and recently in situ barn.

The design is fundamentally modest and in keeping with a rural area and will complement the existing built form along this road and with the addition of natural screening would enhance the visual amenity of the locality.

6.0 RESIDENTIAL AMENITY

The siting of the building is set away from any residential properties.

There will be no material impact on any neighbouring residents.

7.0 FLOOD RISK 4

The site is within a Flood Zone 3 and the building would be built at a raised level with an internal floor level of +300mm.

8.0 PLANNING POLICY

Doncaster Local Plan (adopted <redacted_date>). The most relevant policies are: Policy 1: Spatial Strategy and Settlement Hierarchy (Strategic Policy) Policy 13: Promoting sustainable transport in new developments

Policy 25: Development in the Countryside Policy 26: Green Infrastructure (Strategic Policy) Policy 29: Ecological Networks (Strategic Policy) Policy 30: Valuing Biodiversity and Geodiversity (Strategic Policy) Policy 41: Character and Local Distinctiveness (Strategic Policy) Policy 56: Drainage Policy 57: Flood Risk Management

9.0 JUSTIFICATION

The storage barn with a footprint of approximately 190 square metres has been drawn/designed to exactly match the size and shape of the very recently existing building. Construction materials proposed are exactly the same. The applicant, Mr <redacted_name>, needs to retain some value from the site and the storage barn will have a practicable value and a financial value. The replacement of a very recently existing building with a 'facsimile' is entirely acceptable, and we can not see any reason why this cannot be approved without delay.

10.0 CONCLUSION This proposal therefore provides a number of benefits to the applicant, gives the applicant a practicable and financial value in his site, reflects the characteristics of the area whilst providing a positive contribution to the appearance of the site.
