SUPPORTING INFORMATION

Submitted material comprises a location plan, existing/superseded site plan, revised site plan and highways-related consultation responses. The revised site plan identifies the vehicle crossing width, driveway depth, retained frontage parking area, footway relationship and visibility arrangement.

The proposal is presented as a domestic vehicular access arrangement. The drawings show vehicles parked wholly within the frontage and surface water retained within the site by permeable surfacing or a drainage strip.

ACCESS AND HIGHWAY DETAILS

The vehicle crossing is shown at approximately 3.6 metres wide with the hardstanding behind the highway boundary. The parked vehicle envelope is kept clear of the footway.

The plan identifies the adopted footway edge, dropped kerb position, pedestrian route, frontage drainage strip and local road alignment.
