

Design And Access Statement

Design and Access statement 68 Brookfield Lane, Hexthorpe, Doncaster, ZZ54 0FT The following document is submitted in support of the planning application for the change of use at 68 Brookfield Lane, Hexthorpe, Doncaster, ZZ54 0FT from single residential unit to 5 bed HMO. The property is outside of Doncaster's Conservation Areas, however, is within an Article 4 area. 68 Brookfield Lane, Hexthorpe, Doncaster, ZZ54 0FT is made up of terraced dwellings with on street parking. The property is a two-storey terraced building, with kitchen / dining and living on ground floor, 3 bedrooms and 1 bathroom on the first floor. There is no access from the front of the property to the rear however there is a rear alleyway that runs behind the street. This is where waste and recycling bins are collected for refuse collections and bins are normally stored in the rear gardens which helps to prevent bins being left on pavements causing issues for pedestrians and disabled persons access. The current properties existing materials are: Facing brick facades, Concrete roof tiles and UPVC windows and doors. The proposal The proposal put forward seeks to convert the single-family occupancy dwelling to a 5-bed house of multiple occupancy. The reconfiguration of the internal space has been designed to allow 5 bedrooms with 2 bedrooms on the ground floor , communal kitchen / dining room and W/C. To the first floor the large open hallway has been repurposed to accommodate a bathroom with shower which allows the current bathroom to become bedroom 5 which was originally a very small bedroom 3 and family bathroom. There is also an ensuite to the front larger bedroom. There are no extensions or changes to the external elevations as part of the proposal all changes are internal only. The rear garden area is secure and provides a private amenity space for the occupants and has room for the secure storage of bins and bikes. The rear alleyway is a collection point for refuse and helps keep the pavements clear of obstacles. The site lies outside of any flood risk area as shown in the information below.
