

Appendix 3: Community Consultation

A3.1 Exhibition 1; January 2007

Welcome

Doncaster Metropolitan Borough Council is preparing Conservation Appraisals and Conservation Management Plans for all the Conservation Areas in the Borough. This exhibition concerns the Market Place and High Street Conservation Areas.

The purpose of these documents is to define the special character of the areas and to provide guidance on how their character can be protected and how new development could enhance their quality.

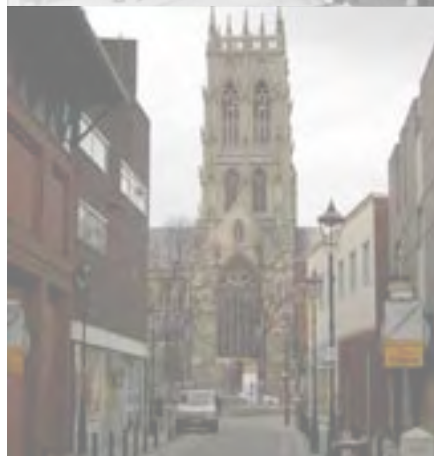

The Appraisals and Management Plans are intended to become Supplementary Planning Document and will be used when assessing planning and listed building applications in the future.

This exhibition describes:

- the conservation areas in question
- a brief history and maps that show how the Market Place and High Street have evolved
- clarification of the current designations and character appraisal
- issues affecting future policies

You are invited to tell us what you think is most valuable about these areas and what you think may require protection and enhancement in the future

We would be grateful if you could complete a feedback form.

- Doncaster Market Place and High Street Conservation Area Appraisals
- Consultation Exhibition September - January 2007

Roman

The Doncaster market was established by the Romans beside their important Roman station and fortress of Danum. This is located just north of Watling Street (now the Great North Road).

Medieval and post medieval

The town flourished again under the Normans. St Mary Magdalen's Church was built and the market was granted a charter in 1193. The medieval burgage plots and St George's Church were established.

18th century

The town grew in prosperity in the eighteenth century. The town trade was boosted by coach traffic. The Corporation made many improvements. This included constructing many public buildings, paving streets, demolition of the wattle and daub and replacing with brick building. The St Leger race became an enormous fashionable event.

19th century

The town expanded greatly. The market was modernized by providing covered structures, including a new Market Hall, Wool Market, Corn Exchange, the parsonage yard was leveled and became a focus for public activities. The Town Hall was demolished revealing the remains of St Mary Magdalen. The railway was opened in 1848.

20th century

The Corn Exchange became renowned for the political rallies and concerts that were held there. In 1904 the Corporation gained the powers to widen streets. The market was expanded in 1930's, later survived despite proposals to re-locate it. The Market Place and High street were declared conservation areas in 1970's. Church Way was cut through and St Sepulchre's Gate gained an indoor shopping centre.

- Roman road - Watling Street
- Frontages on Roman road
- Approximate line of medieval town boundary
- Gateways into historical town
- Market area
- Site of Guildhall
- Priory Place cut through, c.1830
- Road widening schemes in early 20th century
- Church Way Road, cuts through and forms barrier

Appendix 3: Community Consultation

A3.1 Exhibition 1; January 2007

Development over time

Roman fort

Medieval town

Nineteenth century expansion, c.1852

Eighteenth century town, c.1767

Roman Doncaster or Danum

This map shows the line of the fort and roman streets superimposed over the current street layouts and shows the Minster (labelled St George's Church). This indicates that the site of the current market is outside the roman town walls.

Medieval Doncaster

This map has been prepared by archaeologists to show the medieval town contained by the rivers and the town ditch. The city gates are shown. The roman Watling Street (Great North Road) runs along the High Street and is contained within the medieval town. Burgage plots line the Hall Gate. The market place is established around the St Mary Magdalen Church

1767 Eighteenth Century Doncaster

The town has prospered however, on this map of 1767 the town still follows closely the medieval pattern.

1852 Nineteenth Century Doncaster

Within 100 years the town has expanded enormously. The inns and major public works have been carried out. The form of the centre is substantially as we know it today.

1928 Early Twentieth Century Doncaster

Infrastructure works have been carried out in the town centre including road widening schemes and the culverting of the River Cheswell. The later twentieth century brought a new wave of public buildings and the inner ring road.

Early twentieth century, c.1928

- Consultation Exhibition September - January 2007

Appendix 3: Community Consultation

A3.1 Exhibition 1; January 2007

Market Place Conservation Area

Survival of elements that have determined the form of the Market place Area

- Triangular plan derived from medieval road pattern and defensive lines
- The town ditch that ran under the line of Silver Street
- Roads that enter the market place; Baxter Gate, Scot Lane, High Fisher Gate, Sunny Bar
- Market hall, Wool Market and Corn Exchange
- Burgage plots to the south, east and west
- The relationship of buildings to open spaces particularly to the south and north of the corn exchange
- The profile of the roof of the corn exchange that is a landmark in the town rising over the surrounding roofs
- The space around the central market buildings flows around the central buildings creating a reflexive relationship between the main building market buildings and the surrounding street elevations.
- The street improvements of the early twentieth century
- The clearance of the land to the north of the market
- Cutting of Church Way in late 20th century between Baxtergate and St George's Church

- Doncaster Market Place and High Street Conservation Area Appraisals
- Consultation Exhibition September - January 2007

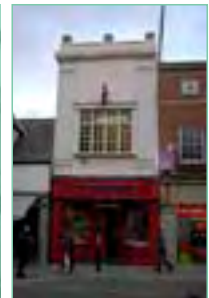

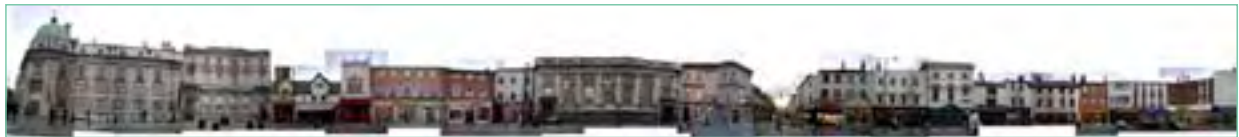

Appendix 3: Community Consultation

A3.1 Exhibition 1; January 2007

High Street Conservation Area

Elements that determine the form of the High Street Area

- The High Street itself, the Great North Road, and originally Roman Watling Street,
- The medieval Hall Gate and French Gate leading to the River Crossings
- The medieval defensive lines and the town ditch following the route of Market Road / Silver Street / Cleveland Street / Printing Office Street
- The medieval road pattern High Street, Hall Gate, St. Sepulchre Gate, Baxter Gate, Scot Lane
- The surviving traces of the burghage plots
- The private yards especially behind the Hall Gate and Wood Street
- Relationship of buildings to the street (this area does not have other public open space).
- 19th century cutting through of Priory Place
- The early twentieth century road widening schemes
- The variety of commercial premises – from 16th century to 21st century
- Late Twentieth Century Road Building of the Inner Ring Road – Trafford Way
- The Frenchgate Shopping Centre facing on St Sepulchre Gate

There are currently ten entries on the Forty Second List of Buildings of Special Architectural or Historic Interest that are located within the Market Place Conservation Area and 46 that are located within the High Street Conservation Area:

Address	Date of construction	Listing Grade
1 Nos. 54 & 55 Market Place (south side)	mid 18th century	Grade II
2 Nos. 50 & 51 Market Place (south side)	early 18th century/early 19th century	Grade II
3 No. 49b Market Place (south side)	early / mid 19th century	Grade II
4 Nos. 47 & 48 Market Place (south side)	early 19th century	Grade II
5 The Woolpack Hotel, Market Place (east side)	mid 18th / early 19th century	Grade II
6 Nos. 28 & 29 Market Place (east side)	early 19th century	Grade II
7 The Queen Hotel & 1. to 5 Sunny Bar (consecutive); Market Place (east side)	late 18th century/early 19th century	Grade II
8 The Magdalen Hotel; no. 20 Market Place (east side)	early 18th century	Grade II
9 Wool Market; Market Place (east side)	1869	Grade II
10 Market Hall, Corn Exchange and Fish Market	1847-9, 1870-3, 1930	Grade II*
11 Nags Head & No. 33 St. Sepulchre Gate	c. 1930	Grade II
2 No. 1 High Street (north side)	1897	Grade II
3 No. 3 High Street (north side)	1882	Grade II
4 Nos. 4, 5 & 6 High Street	16th century	Grade II
5 No. 12 High Street (north side)	1925	Grade II
6 No. 16 High Street (north side)/side	1841 / 1906	Grade II
7 No. 17 High Street (north side)	early 19th century	Grade II
8 No. 18 High Street (north side)	early 19th century	Grade II
9 Nos. 19 & 20 High Street (north side)	early 19th century	Grade II
10 No. 21 High Street (north side)	1841	Grade II
11 No. 22 High Street (north side)	early 19th century	Grade II
12 No. 23 High Street (north side)	late 18th / early 19th century	Grade II
13 Nos. 24 & 24b High Street (north side)	late 18th century	Grade II
14 No. 25 High Street (north side)	late 18th / early 19th century	Grade II
15 No. 40 High Street (south side)	1780; re-faced c. 1920	Grade II
16 No. 41 High Street (south side)	late 18th century	Grade II
17 No. 42 High Street (south side)	early 19th century	Grade II
18 No. 43 High Street (south side)	1826 (portico only)	Grade II
19 No. 44 High Street (south side)	mid 18th / 19th century alterations	Grade II
20 Mansion House	1746-50; 1801-06	Grade II
21 Nos. 47 & 48 High Street (south side)	c. 1920	Grade II
22 Nos. 50 & 51 High Street (south side)	mid 18th / 19th century alterations	Grade II
23 No. 52 High Street (south side)	early 19th century	Grade II
24 No. 55 High Street (south side)	1912	Grade II
25 No. 1 Buxter Gate (west side)	1892	Grade II
26 Nos. 24 & 25 Buxter Gate (east side)	1754	Grade II
27 Nos. 1, 2 & 3 Priory Place (east side)	late 18th / early 19th century	Grade II
28 Nos. 4 to 13 Priory Place (east side)	early 19th century	Grade II
29 Post Office, Nos. 24, 25 & 26 Priory Place (east side)	c. 1885	Grade II
30 Priory Methodist Church, Printing Office Street	1832	Grade II
31 No. 5 Hall Gate (north side)	early 19th century	Grade II
32 No. 6 Hall Gate (north side)	mid 19th century	Grade II
33 Nos. 7 & 7a Hall Gate (north side)	early 19th century	Grade II
34 No. 8 Hall Gate (north side)	late 18th century	Grade II
35 No. 9 Hall Gate (north side)	late 18th century	Grade II

Possible extensions to areas

Proposed extensions to the Conservation Area Boundary

1. Market Road/ Sunny Bar Junction
2. Silver Street east side
3. Printing Office Street south side
4. Waterdale
5. St Sepulchre Gate

Unlisted Buildings which contribute significantly to the Conservation Area

- A. Mason's Arms: a unique survival of an 18th century inn on the Market Place
- B. Doncaster Free Press office,
- C. Winchester House, a good example of a commercial building following early twentieth century road widening
- D. The Old George Hotel (The Courtyard), an important coaching Inn at the entrance to the Market
- E. The Royal Bank of Scotland (15 St Sepulchre Gate), a neo-Palladian composition
- F. 16-19 Priory Place (west), Regency houses forming a group with the houses on the east side

- Frontages/Views
- Noteworthy buildings
- Existing boundaries of conservation areas
- Proposed extensions to conservation areas

Additional Market Place Projects

The Wool Market

The key objective of this project is the refurbishment of two sides of the Grade II listed Wool Market building, returning it to its original character; offering local market traders and communities the opportunity to do business, and shop in a safer, cleaner environment with greater opportunities for cultural and leisure pursuits.

By improving the look and layout of the Wool Market, the Markets Management will be able to operate more efficiently, reduce unmaintainable costs, design out crime and bring back an under used historic building into fuller economic and social use.

DONCASTER PUBLIC CONSULTATION MARKET PLACE & HIGH STREET CONSERVATION AREAS

QUESTIONNAIRE & COMMENTS SHEET

Please look through the Exhibition and let us know what you think by completing this form and handing it back to us or returning it to the contact below by Friday 2 February 2007.

Nicola Forde, John Thompson & Partners. Wren House, 43 Hatton Garden, London, EC1N 8EL.

Do you have any comments or additions you would make to the character assessment?

Please tell us what you like most about the area.

Do you believe there should be more control the Conservation Areas? For example:

- possible extensions of the Conservation Areas
- more protection e.g. features doors or window design?

Do you have any views on possible new developments that may affect the character of the Conservation Areas, for example in Church Way or Market Place?

Any other comments?

Please mark up the map overleaf with your ideas.

Would you be interested in further consultations?

Doncaster Conservation Areas. January 2007 questionnaire results

Q1 - Do you have any comments or additions you would make to the character assessment? What do you like most about the area?

The age and character of the buildings
Unknown
To keep the character of the area
Unknown
Unknown
The wool market and eastern / western market areas need to be redeveloped the most - they resemble sheds and are unsightly. Character is an overused word. The wool market has no character at all.
I like the mix of buildings of different ages as now so please do not ban new designs in future, just be sure that they are quality built.

The random nature of the buildings that somehow blend into a pleasing overall form. If only the shop fronts would blend in.
Better roadways now. Better public transport intersection retention and use of old buildings in town area quite good.
Unknown
The variety of food and non-foods available at reasonable prices. Happy stall holders. The café in the Corn Exchange and the building in general.
The market in general and Corn Exchange particularly.
Unknown
Good quality new buildings are required to compliment the old.
Partly run down but lots of shops and pubs.
You need to open up the market area by removing "prefabs" in front of wool market etc
Unknown
Buildings are attractive.
Please stop developments.
The new bus depot
Unknown
Doncaster's best part was the market.
Unknown
Love market but biggest threat is access in terms of parking. Love the atmosphere. Buildings are important but fact is that it's the market that is important and the fact that it is covered.
Waterdale should have a bomb put under it; it's a wasteland - good space which
Unknown
Looking after the Listed Buildings.
The closeness of the market to other shopping areas and the feeling of community in the surrounding area.
Doncaster High Street was described in a national directory of 1829 as the finest High Street on the road between two capitals. It has retained its human scale and much of its Georgian architecture; it has gained some fine Victorian and Edwardian buildings. The town centre was noted for its rounded street corner buildings.
More detailed architectural features could be considered, the original building , roads layout and pavings that give a medieval feeling to the place.

Appendix 3: Community Consultation

A3.1 Exhibition 1; January 2007

Q2 - Do you believe there should be more control over the Conservation Areas? Possible extensions of the Conservation Areas? More protection e.g. features, doors or window design?

Yes, yes

Probably more control over shop/market signage and structural alteration but I feel the "defined" areas as they are - are adequate.

Yes, Conservation Areas should be extended as soon as possible before we loose some more real gems in surrounding areas. When I look at your display and see some of the beautiful buildings with real character we have knocked down - it must not happen again.

Agree with both also enforcement of build that does not conform.

Yes to both above. Powers that be should look up at the buildings, some are being destroyed by lack of repairs.

The Grand Theatre should be retained - Regent Square / South Parade. Yes features should be protected.

As much protection as is reasonable. The modern shop fronts spoil nearly all the old, lovely buildings. Conservation Area status is a must.

Consider it sufficient to retain the conservation areas as existing now.

Not so much control as encouragement by the Council to help spruce up parts of the area which may be improved.

Yes

Should be extended but not to limit development but encourage it.

Possibly could do if found room e.g. open land.

Restricts development, people should be able to do what they like

To replace shop fronts with traditional styles.

Yes

More protection for our old buildings etc

Yes - extend to South Parade and Regent Square. Doncaster doesn't make any use of the riverside area.

Extend the conservation area without restricting growth and new ideas.

Flood the area with shoppers to give businesses the opportunity to make sufficient money to regenerate the area. Repairing roads and pavements would also help.

Yes

What about South Parade? More of the shops fronts have already been altered from existing architecture.

Yes, most of the buildings should be kept as they are if possible, and any new construction should fit in with the existing structures when new building is considered.

We agree with your proposals for extending C.A. We are pleased with your choice of notable but unlisted buildings. However there are others of equal importance. We can provide details of our views if you wish. We are disappointed with the quality of shop signs, often poor - e.g. photo adverts. Would like to see more control over features such as windows.

I believe the conservation area should be more preserved in its original character establishing rigid roles on frontage of building especially at ground level, like in many European historic towns.

More protection for buildings, doors, window design and new buildings should be made to blend in - not stand out like a sore thumb.

Q3 - Do you have any views on possible new developments that may affect the character of the Conservation Areas, for example in Church Way or Market Place?

Yes, I believe the proposal to change the Market Area into a city square to be of fundamental significance and will help to establish Doncaster as a city

Proposed "High Fisher Gate Hotel" overpoweringly high, out of keeping with the area and blocking a good view of Minster - another disaster like the hotel between the Winter Garden and Peace Hardens in Sheffield. The St James Pool and Leisure Centre is a fine building of 1930 design, carerra marble etc that needs protecting and refurbishing.

Implement "The Great Street" (Church Way) scheme so buildings have a nice and appealing façade towards the Minster

St Georges roundabout is the biggest barrier and badly designed scheme of recent times. I welcome the plan to replace the roundabout with a large "T" junction instead - bearing in mind how busy Church Way is and not impeding traffic flow further.

Strict with the architects / designers of proposed new buildings so that they compliment existing buildings/

The Old Bridge should be open to all traffic and the road in front of the Minster closed so bringing the Minster back into the town.

We need a safer and easy access to the river front and the college, it is a death drop for pedestrians. NO MORE PUBS. Give us back our town at night.

New development should be in keeping and blend in.

Hopefully any new developments will not spoil the character of the older, historic buildings.

Better access on to Church Way from the French Gate centre for cars!

The "opening up" of the area approaching St Georges Church has had a very beneficial affect to the Doncaster "Vista". I hope the new developments don't impede the view.

Church Way feasibility scheme should be commissioned to help show ideas.

I could bring people in but it wouldn't have many cultural parts to the town.

Any new buildings should be "striking" and innovative rather than corporate "boring" to add interest and diversity to the area.

Hall Gate - just pubs and bars, need more shops. Shop fronts - Bradford Row, now covered. They're not clean and need a steam wash. It all needs long-term upkeep and maintenance.

Stalls should stay all the time, they don't need to be packed away.

Pedestrianise High Street - Market Place.

Not really.

Modernise but retain historic character. Frenchgate - could be anywhere. The "College Hub" does not fit in.

shame to lose it.

Just to update our market as Doncaster was an old market town

New interchange is bad.

Not really.

I appreciate pedestrian areas and the market gateway. The market always looks a bit dire, but houses some well worth stalls.

Yes, if car access is made a priority I'm afraid the area will not benefit. At the moment the market area is plagued by vehicular traffic, making it unattractive and even dangerous for elderly people and mothers and toddlers.

I think more car parking same as market, would be a great thing, also there should be parking for stall holders; for security reasons. We got a signed petition when car park changes went up from 15p to £1.

Yes. We have a great deal of concern about the proposed high rise developments on Church Way which will impact negatively on the market place. We would like to see some smart market stalls - more in keeping with the market buildings.

The proposal for the hotel building look very inappropriate as it overwhelms the store exchange. I would concentrate on a new frontage for Church Way, a frontage that blends in the surrounding characteristics enhancing the landmark buildings instead of overpowering them.

If the stalls in the Wool Market are changed to make them all the same it will kill the character of the market. More should be done to preserve the whole character of the town centre, any new buildings should be made to blend in with old Doncaster. Doncaster is an old market town and should stay a market town.

Appendix 3: Community Consultation

A3.1 Exhibition 1; January 2007

Q4 - Any other comments?

City Square with seating areas, fountains, small maintained grassed area. A place that people can feel they are in the heart of somewhere important

The whole area needs refurbishing

Multi-storey car park to replace existing car park with market offices and toilets underneath

Introduce moratorium so all new build in town centre should complement what's already there. Dixon's building on the High Street is a good example of a building that blends in.

I think my Council do a brilliant job of providing a town with a quality feel and keeping it clean. I would welcome better traffic provision and a revamp of the market area. The collage is a good example of what is needed. More consultation with the public. Development that are to take place should have full public consultation. Stands at events i.e.: - like the Minster fete last year where 600 commented on the Waterfront, plan for the year so future developments are shown to a captive audience.

We have our doubts whether all this will make any difference. We think the Council have already made up their minds. They never listen to anybody.

No central meeting place in Doncaster anymore. Silver Street is a no-go area at night.

Good luck with Conservation Area status.

More information stating what the buildings are and what they contain.

The photographic displays include "Romans" (twice) and "across". Doncaster people deserve better.

A large model should be commissioned showing massing as well as developments.

There's too many different types of pavement. The time line is not good and there are too many gimmicks. The trees outside the Mansion House aren't nice. Guild Hall was nice but now there's just too much clutter.

The banks are nice buildings.

Mansion House is nice but there is too much street clutter. Debenham's and the French Gate centre are no good.

There are some great "old" buildings with poor plastic and glass shop fronts. Keep traditional buildings.

Shop fronts - detract from character. Cables - tighter guidelines on what do within keeping of original building.

No

Doncaster College "The Hub", people aren't too keen. Shop fronts don't fit. Too many pubs. Corner rounded buildings are nice. Don't like the trees outside the Mansion House.

Tidy up at street level.

I'd like Doncaster to be the big and busy town it was, with old and new together like the new bus station (that's great)

Not enough hotels in Doncaster.

The survival of any conservation area depends on the visitors it attracts. Closure of the southern bus station has starved Wood Street, Cleveland Street, Hallgate and Silver Street of shoppers and made this district into a small ghost town. Only the reopening of the bus station will revive the area.

The Cleveland Street bus lane should be opened up to all traffic to help with traffic congestion as not many buses travel through there now due to the new interchange.

Couldn't you get a local firm to do this consultation? Why the consultation? Are plans afoot? Or is it an expensive way of spending money? I do not understand the reason.

Also; because something is old it does not necessarily mean it is worth preserving i.e. millions spent on Brood Hall, equally millions to be spent on the Minster -which is only approx. 150 years old and is it of any particular architectural value? Even more so Graveyard Chapel. Two good things; the bus station and a bookshop. Bad things; access to station - more difficult on foot (please put back pedestrian crossing), empty shop outlets in town (its all too big), tin foil front image - it was nicer without this and having its reflective band - which shaved off architecture of surrounding buildings.

Sorry to harp on, but further restriction of car traffic should be a priority if any sense of community is to be preserved / created.

I have never known anything as stupid as people having to cross busy roads, traffic lights, in my opinion car parking should be found adjoining market. I wish something could be sorted out where people put their stock out in the isle in excess. There is a yellow line in the Irish middle market, and if people put stuff out both sides you can hardly walk down. There is a open drain opposite my brothers stall; in warm weather the smell is terrible. I have a map 1906 and I know there was a market there; Cattle Market at a cost of £5452 was erected in 1869.

High quality paving in High Street should be extended throughout the conservation area.

The view of the modern intrusive buildings from the market place should be reduced to the minimum. Material like local stones should be used.

Yes
Yes
Yes
Yes
Yes
Yes

Notes on map - page 2
1923/4 Education Act. Doncaster 1 of 8 that set up / had 5 schools
City Square - Civic space with fountains and seating area. A place where people can congregate during public occasions such as NYE, public / open air concerts
As already detailed
Remove badly designed roundabout (N of Market Place); the area to the N of the market place is an eyesore and needs a total revamp / demolish; the work done on pedestrianising St Sepulchre and High Street is a testament and a showcase as to how good out town could be. I'm surprised the area (around Hall Gate) is actually a conserved as it has a run down feel and no atmosphere
Close road to the N of Church Way. Extend conservation area to the E of Silver Street / N of Hall Gate. Open the old bridge up to all traffic.
Keep character of buildings either side of the bottom of Silver Street where they meet the High Street.
The bus station should be re-opened to feed the Wood Street, Cleveland Street conservation area.
For the area facing onto Church Way - "low profile, pleasant, stone and transparent glass for a modern light structure that doesn't stand out i.e. Castelvechio Museum or Whitby Abbey Museum. Not to have a barrier building in that area but a "connecting", "moving" building that people can walk through.

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Welcome

Doncaster Metropolitan Borough Council is preparing Conservation Appraisals and Conservation Management Plans for all the Conservation Areas in the Borough. This exhibition concerns the Market Place and High Street Conservation Areas.

The purpose of these documents is to define the special character of the areas and to provide guidance on how their character can be protected and how new development could enhance their quality.

The Appraisals and Management Plans are intended to become a Supplementary Planning Document which will be used by the council when assessing planning and listed building applications in the future.

An exhibition and consultation events were held in January 2007 to gain your reaction to the Character Appraisals. Your comments and questionnaires have informed our response; now we are presenting proposals for the management and improvement of the Conservation Areas.

This exhibition describes:

- the Conservation Areas in question – see the plan on this panel
- your feedback
- our response - special powers for protection- guidelines for new development - extensions to the Conservation Areas
- background material in case you missed the first exhibition

We would be grateful if you could complete a feedback form and give your reaction to the recommendations.

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Feedback from Consultation

"I like the mix of buildings of different ages as they are now... their random nature somehow blends into a pleasing overall form"

PEOPLE LIKED:

Buildings

Age and character
The random nature of the buildings
The character of the outdoor markets
The Market Place
The variety of shops and market stalls
Church Way and The Minster
Dixon's building on High Street
The Grand Theatre
The Mansion House

Streetscape

Pedestrianisation especially in St Sepulchre Gate
The 'opening up' of the area approaching St George's Minster
The corner buildings where Silver Street meets the High Street / Hall Gate

Other

The feeling of community
Being involved in changes

ISSUES

General

Lack of enforcement of conservation area regulations
Lack of repairs on some buildings / shop fronts
Hall Gate has no atmosphere – "it is too run down to be a conservation area"
Hall Gate needs more shops
Unsightly Wool Market and Eastern and Western Markets
"Waterdale should have a bomb put under it! It's a wasteland"
Church Way needs to be improved
The appearance of the Frenchgate Centre (tin foil)

Streetscape

Too many different types of pavement e.g. the Time Line
Too much street clutter
Filthy, dirty pavements near pubs
Open drain opposite some stalls in the market place

Parking and getting about

Not enough parking for the stall holders!
All the traffic problems in the town need to be addressed!
Poor access from the station to the town
Closure of the southern bus station has starved the streets of shoppers

Other Issues

Not enough hotels in Doncaster
Too many pubs – night time safety is a problem
Relationship between locals and the council/market management

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Feedback from Consultation

“Extend the conservation areas not to limit development but encourage it ... new buildings should add interest and diversity”

IDEAS

Conservation Areas

Control architectural design in keeping with traditional style
Return doors / windows to “original design”
Provide encouragement to help spruce parts up
Improve shop / market signage
Provide information for people about the buildings, their history and what they contain

New Development

Extend areas to encourage development not limit it
New buildings should contribute to the City’s character
Commission a Church Way feasibility scheme
Build a large model showing massing as well as development
New buildings should be “striking” and “innovative” rather than corporate to add interest and diversity to the area

Market Place

Covers are needed above all market stalls
Remove “pre-fabs” in front of Wool Market to open up the area
Fully pedestrianise the Market Place and the High Street
Make the Market Place into a City Square to help establish Doncaster as a city
Create a central meeting place

Parking

More parking especially close to the market
Longer parking times in the market car park

Getting About

St George’s roundabout could be replaced with a T-junction
Better car access onto Church Way from the French Gate Centre
Create safer and easier access to the river front
Open up Cleveland Street bus lane and the Old Bridge to all traffic to ease congestion
Close the road in front of the Minster

RECOMMENDATIONS

We have taken your comments and have come up with these recommendations

- **Greater Control in the Conservation Area**
- **Shop front Guidelines and Areas of Special Control of Advertisements**
- **Special control over door and window replacements**
- **Guidelines for public realm improvements**
- **Guidelines for new building**
- **Review of Conservation Area Boundaries**

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

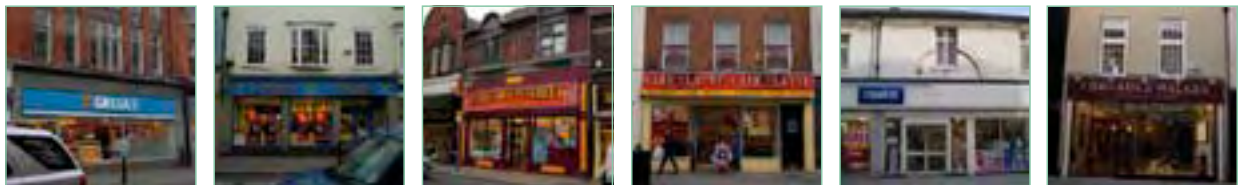

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Shopfront Design Code

“The modern shop fronts spoil nearly all the old, lovely buildings”

Examples of poor shop-front practice: • Garish colours • Oversized and inappropriate signage • Inappropriate materials such as brick, metal and plastic
• Large expansions of glazing at odds with smaller glazing to upper storeys • Little or no co-ordination with the structure above

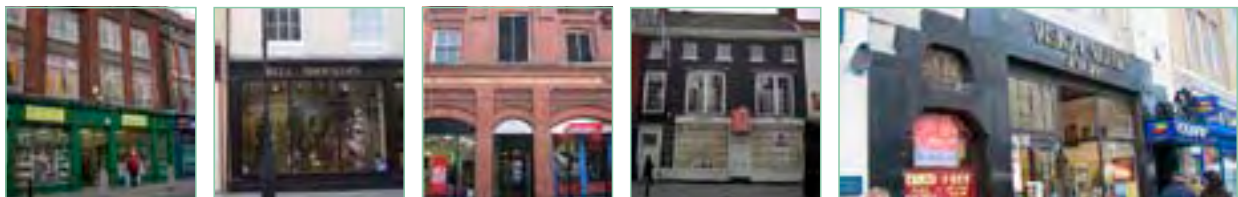

In a conservation area there are currently no additional powers to control signage. Only where signage is illuminated is any consent needed or on a listed building.*

RECOMMENDATIONS

- The Market Place and High Street Conservation Areas are designated an 'Area of Special Control of Advertisements'
- The shop front should reflect the architecture of the whole building including the architectural character of the upper floors

SHOPFRONT PRINCIPLES

Typical town house type

Examples of good shop-front practice: • Correlation between upper and lower storeys • Respect for existing structure and features • Division of glazing into smaller panels
• Use of appropriate materials i.e. timber, stone • Subtle, regularly sized signage in muted colours • Retention of existing original features • Use of details that suit the original character of the buildings.

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

* Signage above fascia level may need consent

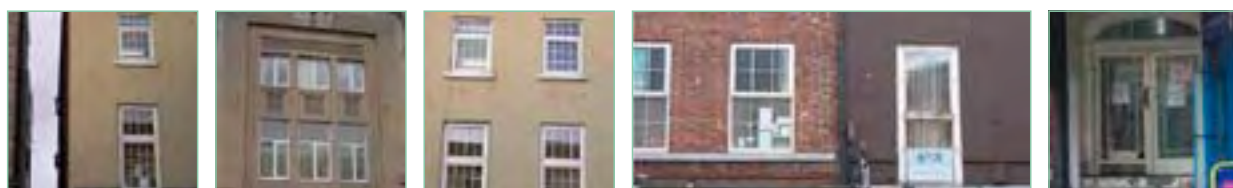

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Door and Window Design

“...return doors and windows to the ‘original design’, in keeping with the original design of the buildings”

Examples of poorly detailed windows and doors in poor condition: • Use of inappropriate materials such as UPVC and aluminium
• Loss of original glazing bars, vertical sliding sashes replaced by pivot and casement windows • Too many / to few glazing bars • Original opening size and proportions altered.

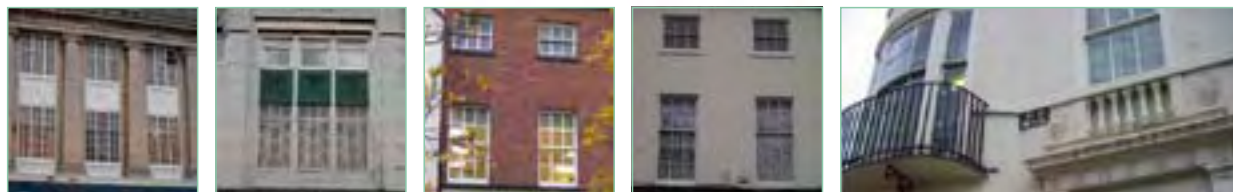

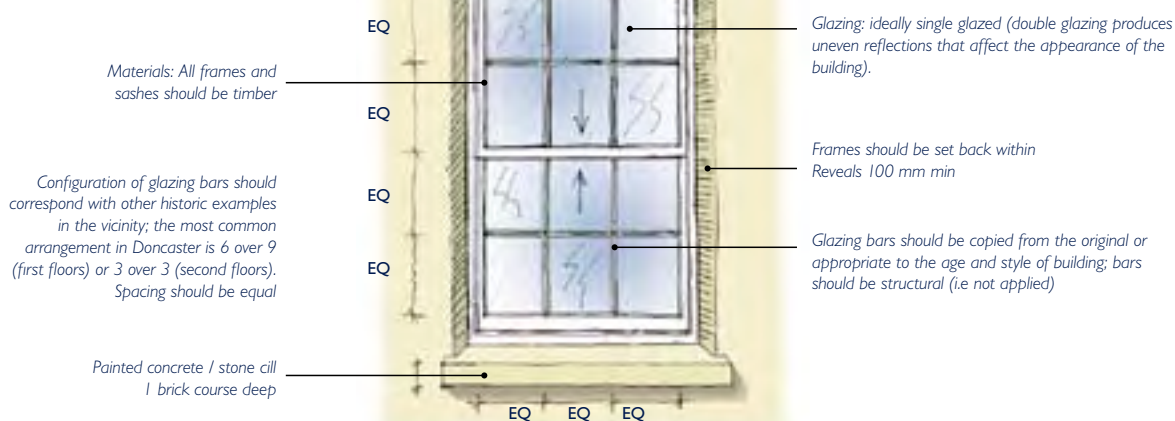

There has been an unauthorised erosion of original features and details; unlisted commercial properties are particularly vulnerable

RECOMMENDATIONS

- Clarity on controls over alterations to doors and windows are put in place
- Guidance to be written showing good practice and distributed to property owners. This could also include repairs of other materials such as stone, brick, stucco and ironwork

WINDOW PRINCIPLES

Vertical sliding sash type

Examples of good window practice: • Appropriate materials (timber) • Retains original design and configuration of glazing bars, etc • Original opening size retained

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Public Spaces and Market Place

“There are too many different types of pavement and too many gimmicks...there’s just too much clutter”

Examples of modern utilitarian elements such as masts, bollards, podiums, railings and seating that impede access and mobility, clutter the townscape and detract from the historic character of the town. Build on good practice and examples of stone paving for example around the east side of the Corn Exchange.

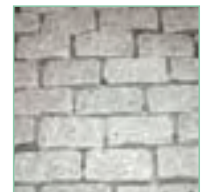

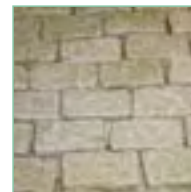

A large number of people have commented on the clutter in the streets, spaces and difficulties getting around the town. Many people would like to see improvements in the Market Place and the creation of a public open space

RECOMMENDATIONS

- A review of public spaces by considering the quality of Space - Place - Life
- Undertake consultation to decide on proposals for the market place, Church Way and the new development at the north end of the Market
- Create new public space by using de-mountable stalls when market not operating
- Improve Hall Gate environment
- De-clutter streetscape throughout the town
- Improve commercial and pedestrian access
- Use high quality traditional materials

Removal of permanent market stalls and replacement with de-mountable examples would free up views of important buildings and allow the Market Place to be used as a public space on non-market days.

Build on good practice here we show some european examples and some good examples within Doncaster

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Guidelines for New Development

“Hopefully any new developments will not spoil the character of the older, historic buildings”

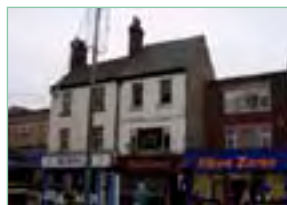

Plot widths of new buildings should reflect the urban grain of the existing town, together with storey heights and rhythm & proportions of openings

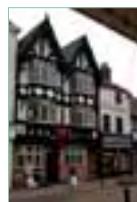

Amongst the good buildings of Doncaster there are some eyesores and a few “gaps” in the streets. Major projects and changes planned to the north of the Market Place and along Church Way that will have a large effect on the Conservation Areas

RECOMMENDATIONS

- Promote a strong character that respects the character of the Market Place and the High Street
- Identify good practice examples within Doncaster and elsewhere
- Reflect the traditional plot widths
- Follow the line of the building frontage at the back edge of the pavement
- Keep to traditional storey heights
- Respect the proportions of door and window openings
- Use appropriate materials
- Enhance key views
- Maintain the views of the Minster tower from the Market Place
- Allow glimpses of the Market Hall roof from surrounding streets
- Promote an architectural style to complement the area

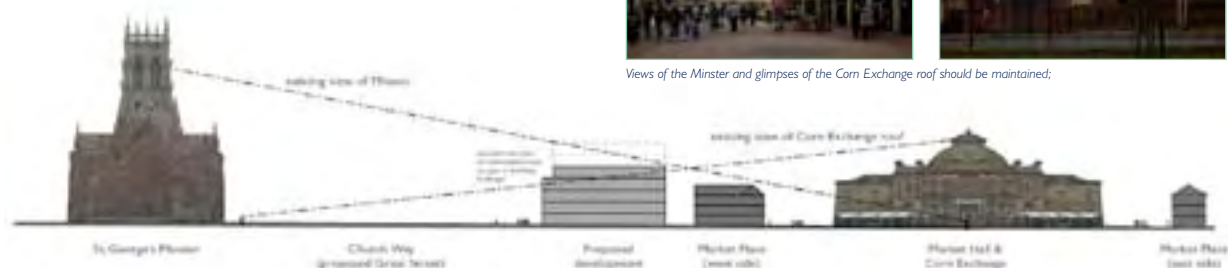

The original building line at the back edge of the pavement should be respected to avoid erosion of the character of streets

New development should reflect the diverse nature of the existing building styles and complement them

Views of the Minster and glimpses of the Corn Exchange roof should be maintained;

- Appraisals and Management Guidelines

Exhibition February 2007

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Possible Extensions to Areas

"Yes, Conservation Areas should be extended as soon as possible before we lose some more real gems in surrounding areas"

RECOMMENDED EXTENSIONS TO THE CONSERVATION AREA BOUNDARIES

- ① Market Road to Silver Street
- ② Waterdale
- ③ Printing Office Street south side
- ④ St Sepulchre Gate

- Frontages/Views
- Existing boundaries of Conservation Areas
- Proposed extensions to Conservation Areas
- Boundary with adjacent Conservation Area

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

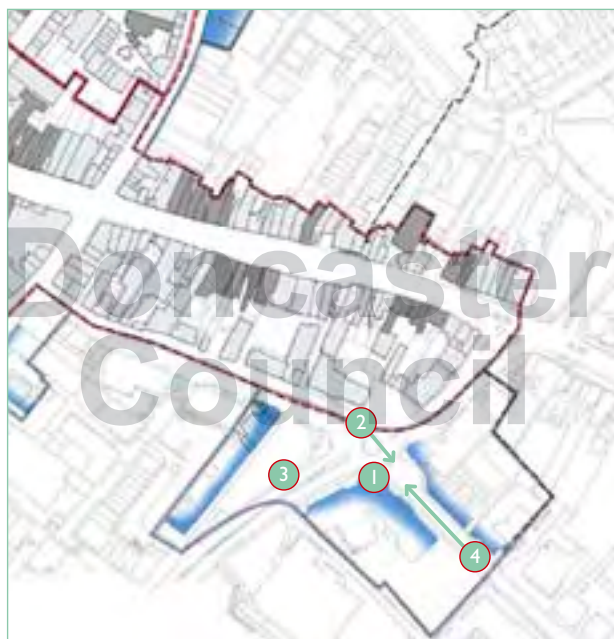

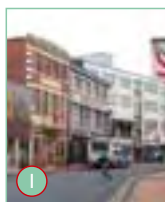

Possible Extensions to Areas

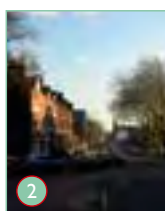

Market Road to Silver Street

- The character of Sunny Bar is defined by the junction of roads; inclusion of the corners will protect views in and out of Sunny Bar
- Silver Street is enhanced by two good commercial properties which are shown included

Waterdale

- The historic space has been eroded by cars and clutter but has the potential for a quality public space
- The North-West side is defined by Harwood Terrace
- The corner is defined by the former Girls School
- Views up Chequer Road are framed by the terrace, the school and the trees

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

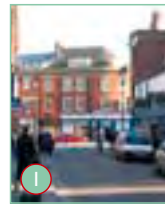

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

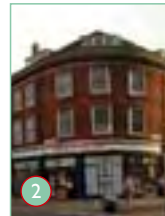

Possible Extensions to Areas

Printing Office Street

- Inclusion of the South side of Printing Office Street protects the parade of shops
- The inclusion of the corner with Cleveland Street protects three of Doncaster's famous rounded corners and buildings of character

St Sepulchre Gate

- Inclusion of St Sepulchre Gate protects historic routes to approach the centre
- Includes some good commercial buildings
- Anticipates high quality improvements on Trafford Way and proposed links to the railway station

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Exhibition February 2007

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

What next?

1. Please can you give us your comments and feedback on the questionnaire by the end of February 2007?
2. We will complete the Conservation Area Appraisals and Management Plan by April 2007
3. The Council will recommend that the documents are adopted as a Supplementary Planning Document, including adoption of the revised boundary changes
4. The recommendations will be followed up by detailed documents for adoption
 - Shop front Guidance: Area for Special Control of Advertisements
 - Article 4 directions
 - Special studies for example Public Realm, new build development, or sighting renewable energy devices or satellite dishes
5. The increased powers and the Management Plan will be taken into account when determining Conservation Area Consents (for demolition), Planning and Listed Building applications
6. Information and education will be provided for building owners and the community. Heritage, commercial and community organisations could help with this process
7. The Conservation Area Review is planned for 2012. At this time the condition of the Areas can be compared with the detailed record of 2007

Please let us know your reactions to these proposals!

History & Character

© Crown copyright. License Number 100019782. 2007

Roman

The Doncaster market was established by the Romans beside their important Roman station and fortress of Danum. This is located just north of Watling Street (now the Great North Road).

Medieval and post medieval

The town flourished again under the Normans. St Mary Magdalen's Church was built and the market was granted a charter in 1193. The medieval burgage plots and St George's Church were established.

18th century

The town grew in prosperity in the eighteenth century. The town trade was boosted by coach traffic. The Corporation made many improvements. This included constructing many public buildings, paving streets, demolition of the wattle and daub and replacing with brick building. The St Leger race became an enormous fashionable event.

19th century

The town expanded greatly. The market was modernized by providing covered structures, including a new Market Hall, Wool Market and Corn Exchange. Parsonage Yard was levelled and became a focus for public activities. The Town Hall was demolished revealing the remains of St Mary Magdalen. The railway was opened in 1848.

20th century

The Corn Exchange became renowned for the political rallies and concerts that were held there. In 1904 the Corporation gained the powers to widen streets. The market was expanded in 1930s, later survived despite proposals to re-locate it. The Market Place and High street were declared Conservation Areas in 1970s. Church Way was cut through and St Sepulchre Gate gained an indoor shopping centre.

- Roman road - Watling Street followed the line of the High Street
- Frontages on Roman road
- Approximate line of medieval town boundary
- Gateways into historic town
- Market area
- Site of Guildhall
- Priory Place cut through, c.1830
- Road widening schemes in early 20th century
- Church Way Road, cuts through and forms barrier
- Rounded corners

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

Designations

There are currently ten entries on the Forty Second List of Buildings of Special Architectural or Historic Interest that are located within the Market Place Conservation Area and 46 that are located within the High Street Conservation Area:

Address	Date of construction	Listing Grade
1 Nos. 54 & 55 Market Place (south side)	mid 18th century	Grade II
2 Nos. 50 & 51 Market Place (south side)	early 18th century/early 19th century	Grade II
3 No. 49b Market Place (south side)	early / mid 19th century	Grade II
4 Nos. 47 & 48 Market Place (south side)	early 19th century	Grade II
5 The Woolpack Hotel, Market Place (east side)	mid 18th / early 19th century	Grade II
6 Nos. 28 & 29 Market Place (east side)	early 19th century	Grade II
7 The Queen Hotel & 1 to 5 Sunny Bar (consecutive); Market Place (east side)	late 18th century/early 19th century	Grade II
8 The Magdalen Hotel; no. 20 Market Place (east side)	early 18th century	Grade II
9 Wool Market; Market Place (east side)	1869	Grade II
10 Market Hall, Corn Exchange and Fish Market	1847-9, 1870-3, 1930	Grade II*

Address	Date of construction	Listing Grade
1 Nags Head & No. 33 St. Sepulchre Gate	c. 1930	Grade II
2 No. 1 High Street (north side)	1897	Grade II
3 No. 3 High Street (north side)	1882	Grade II
4 Nos. 4, 5 & 6 High Street	16th century	Grade II
5 No. 12 High Street (north side)	1925	Grade II
6 No. 16 High Street (north side)	1841 / 1906	Grade II
7 No. 17 High Street (north side)	early 19th century	Grade II
8 No. 18 High Street (north side)	early 19th century	Grade II
9 Nos. 19 & 20 High Street (north side)	early 19th century	Grade II
10 No. 21 High Street (north side)	1841	Grade II
11 No. 22 High Street (north side)	early 19th century	Grade II
12 No. 23 High Street (north side)	late 18th / early 19th century	Grade II
13 Nos. 24 & 24b High Street (north side)	late 18th century	Grade II
14 No. 25 High Street (north side)	late 18th / early 19th century	Grade II
15 No. 40 High Street (south side)	1780; re-faced c. 1920	Grade II
16 No. 41 High Street (south side)	late 18th century	Grade II
17 No. 42 High Street (south side)	early 19th century	Grade II
18 No. 43 High Street (south side)	1826 (portico only)	Grade II
19 No. 44 High Street (south side)	mid 18th / 19th century alterations	Grade II
20 Mansion House	1746-50; 1801-06	Grade I
21 Nos. 47 & 48 High Street (south side)	c. 1920	Grade II
22 Nos. 50 & 51 High Street (south side)	mid 18th / 19th century alterations	Grade II
23 No. 52 High Street (south side)	early 19th century	Grade II
24 No. 55 High Street (south side)	1912	Grade II
25 No. 1 Baxter Gate (west side)	1892	Grade II
26 Nos. 24 & 25 Baxter Gate (east side)	1754	Grade II
27 Nos. 1, 2 & 3 Priory Place (east side)	late 18th / early 19th century	Grade II
28 Nos. 4 to 13 Priory Place (east side)	early 19th century	Grade II
29 Post Office, Nos. 24, 25 & 26 Priory Place (east side)	c. 1885	Grade II
30 Priory Methodist Church, Printing Office Street	1832	Grade II
31 No. 5 Hall Gate (north side)	early 19th century	Grade II
32 No. 6 Hall Gate (north side)	mid 19th century	Grade II
33 Nos. 7 & 7a Hall Gate (north side)	early 19th century	Grade II
34 No. 8 Hall Gate (north side)	late 18th century	Grade II
35 No. 9 Hall Gate (north side)	late 18th century	Grade II

Anticipated Changes

View along proposed axis north

View across Church Way

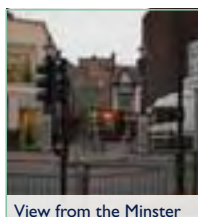

View of Market Place

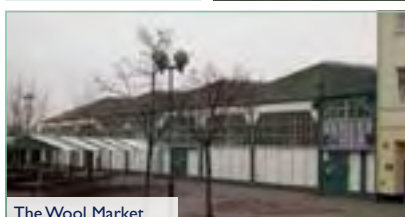

High Fisher Gate viewed from Church Way

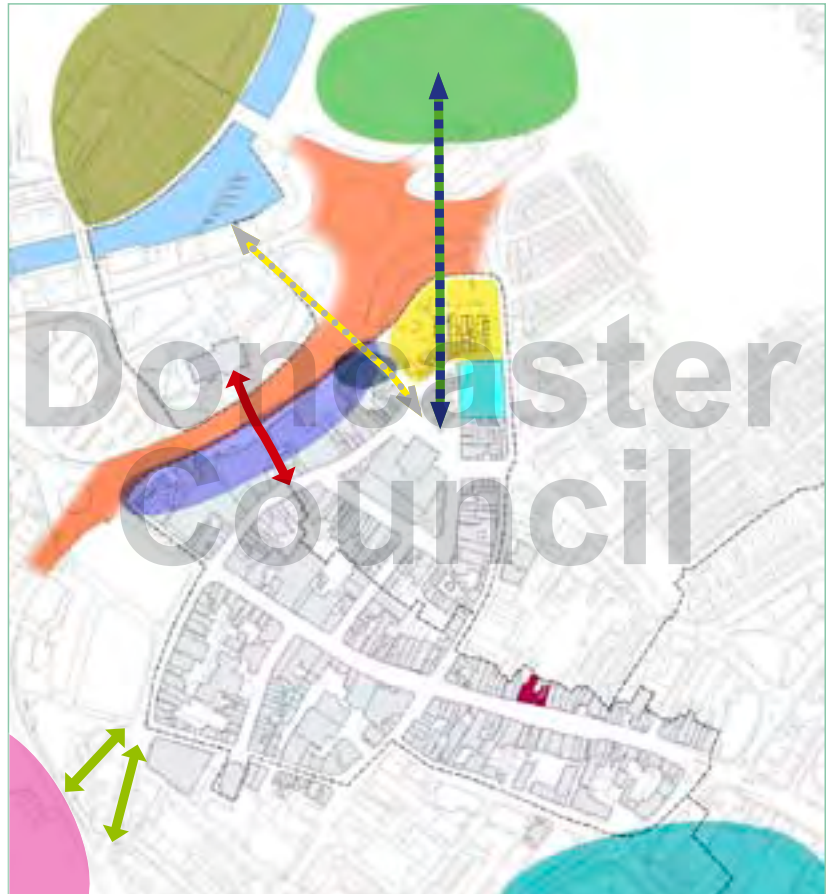

View of the Minster

View from the Minster

The Wool Market

Proposed re-configuring to make new square, Realignment and narrowing of Church Way

Proposed development

Major refurbishment of Wool Market (Elden Minns & Co.)

Application for a new hotel in High Fisher Gate

Creation of new buildings that front onto to Church Way

Application has been made to demolish 10-14 Hall Gate and build public house

New educational city area

Proposed waterfront park

New cultural quarter

Improved connections and crossing to St. George

Proposed access to Educational City with connection to new marina

Links to new waterfront park

Improved connections and crossing to the railway station

Major area of improvements

- Doncaster Market Place and High Street Conservation Areas
- Appraisals and Management Guidelines

DONCASTER PUBLIC CONSULTATION MARKET PLACE & HIGH STREET CONSERVATION AREAS QUESTIONNAIRE & COMMENTS SHEET

Please look through the Exhibition and let us know what you think by completing this form and handing it back to us or returning it to the contact below by **Wednesday 28 February 2007**.
Nicola Forde, John Thompson & Partners, Wren House, 43 Hatton Garden, London, EC1N 8EL

Do you have any comments on the Management Proposals?

Do you support the recommendations?

1. Shop front guidelines and the designation of an Area of Special Control for Advertisements
2. Promoting awareness regarding the requirement for planning permission for replacement doors, windows and roof materials, and guidelines regarding good practice for replacement and repairs

PTO

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

3. (Article 4 Directions) to further control alterations that affect the character and appearance of the Conservation Areas

4. Proposed improvements to the Public realm

- Making the northern market into an open area with demountable market stalls?
- De-cluttering the streets?
- Use of natural high quality materials?
- Improving Hall Gate?

5. Proposed guidelines for new development

- protecting views
- respecting plot widths and character
- Other ideas?

6. Possible extensions of the Conservation Areas

- Market Road and Silver Street
- Waterdale
- Printing Office Street
- St Sepulchre Gate

Any other comments?

Would you be interested in being kept in touch with this process?

Yes

No

If yes please ensure you fill in your contact details below

Address

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

Doncaster Conservation Areas. February 2007 questionnaire results

Do you have any comments on the Management Proposal?

Positive proposals.
I think the management proposals are very good.
Yes. Actively encourage City Centre accommodation/development, City Centre living, apartments. A place where
More consultation needed.
Agree to proposals, maintaining indoor market area and looking at improving other market areas.

Do you support the recommendations?

Yes
No
Yes
Yes
Yes
On the whole, yes.
Yes - but they could go further. What is the long-term strategy here? 10 years? 15/20 years?
Yes

Q1 - Shops front guidelines and the designation of an Area of Special Control for Advertisements

Agree with the proposals, maybe there should be grants / encouragement to speed up the changes rather than waiting
Yes. Keeps with traditional character of town.
Should be stricter control over shop front fascias. Efforts have been made to improve this situation but bad examples
I think it is very important to keep the areas identity and individuality.
Yes, not before time!
Yes
Yes
Please use sustainable materials e.g. windows, gutters (not plastic).
Yes. This is an excellent proposal. Remove the tackiness of the area which currently has cheap plastic shop fronts.
Don't destroy the old aspects of Doncaster, shops should look in keeping with buildings, like No 15 High Street. Look
Yes
Agree

Conservation Areas.

Public need more information on this, see the law as boring and complicated and don't realise its importance.
Yes
Yes - encourage al fresco dining, open air coffee bars, street dining. Make the area sociable, de-regulate outside

demountable market stalls? 2) De-cluttering the streets. 3) Use of natural high quality materials? 4) Improving Hall Gate?

Agree to partly opening up northern market. Totally agree with point 2, too many signs where several signs could be put onto one. Point 4; bus stop outside A&G narrows it too much - narrow the whole road? Grant permission for the
Point 1 - Personally, not a good idea. Not sure how the market traders would react. But means space can be used on non-market days. Point 2 - Good idea. Point 3 - Common sense! Good for long-term maintenance. Point 4 - Essential, All points ticked.
yes. Point 3 - yes. Point 4 - Yes; pavement is filthy. Lazarus Court is disgusting since the roof has been installed as the rain does not wash the paint off. It needs regular pressure washing - would you sit and eat outside a cafe where the pavement stinks and your feet stick to it when you walk?
Point 1 - No, still retaining old fish market. Point 2 - I agree with de-cluttering of streets. Point 3 - Yes to high quality
Point 1 - some. Points 2, 3 & 4 all ticked.
Point 1 - yes, and you should also erect a statue to commemorate a historical Doncastrian. Point 2 - yes and no. De-clutter lampposts, road signs but concentrate on real objects that add value and character to the area e.g. fountains,
Point 2 - yes
Agree with all points

Appendix 3: Community Consultation

A3.2 Exhibition 2; February 2007

3) Other ideas?

First 2 points ticked "but not at expense of working market"

Agrees with protecting views and respecting plot widths and character. Designate which streets / areas should be kept traditional in design and which should be given over to modern (e.g. High Street - traditional; St Sepulchre west area - Point 1 - A characteristic of Doncaster, no high rise. Point 2 - Adds to atmosphere of town. Point 3 - More public info should be made available. For example, put info board in market telling its history and buildings surrounding it, people Points 1 & 2 ticked.

Point 1 - Yes, but what an awful design of hotel to go near the Mister. Not in keeping at all. Please try again. I will be protesting about the planning application. Needs a more sympathetic design. Point 2 - yes.

Point 1 - this idea is a must not just for locals but also for tourists. Point 2 - Yes, keeping as much character as Points 1 & 2 ticked.

In my opinion this is dependant on the type of building that may block the view i.e. if a developer wanted to build high-rise apartments in the Cultural Quarter then maybe they should. Name the area e.g. Cultural Quarter, Market Quarter, Point 1 - ticked

Printing Office Street. 4) St Sepulchre Gate.

Not a good thing if not allowing public to get there - access pedestrianisation "Donut Effect" happening in Doncaster

Agree with points 1, 2 & 3. Point 4 "area around the two streets behind / following the Halifax building are not good

Point 1 - Would argue this already part of market area and should be included in this. Point 2 - Even though is ugly it is still part of the towns history. Point 3 - Some lovely buildings and good example of new redevelopment. Point 4 -

All points ticked.

All good ideas.

Yes to extension of conservation area but also improve some of the shop frontages but also making it attractive for Points 1, 2, 3 & 4 ticked.

not precinct) adds tremendously to the look of the area. Point 4 - statue of Roman soldier, this place has historical significance further. Your consultation event would have had a reaching effect if you had published the designs on the internet and joined with local media to publicize the consultation. Local people could have commented on-line, particularly those who are not in the centre of Doncaster on a Saturday. You could even have had a consultation or Yes. Point 2 - needs more work on; Frenchgate centre drains everything from Waterdale. Point 4 - Yes, but do other Points 1, 2, 3 & 4 ticked.

Point 1 - pedestrianisation of this area would be good.

Any other comments

Include within guidelines provision for parking (traders), access (traders and public), assess buses, improved public transport links and roadways, public toilets, stalls with working behind (working with vehicles)

Doncaster Council Market management do not run the market and are incapable of doing so. In my eyes they are trying to destroy it instead of improve it. Not sufficient parking.

This display was an excellent idea and made public aware of issues. Actual display very well designed and layout.

I think Doncaster markets etc are very good. If the area can be improved without destroying its individuality that would

Any new build should be carefully designed. No point preserving what we have if we don't make more effort on design

Make sure of transport for people to be able to shop round Waterdale area as this has been ruined by combining bus stations and closing down the southern bus station on Waterdale.

Close or dual carriage way in front of the Minster and open up North Bridge to all traffic.

Too many pubs, they outnumber the shops. Some frontages need a facelift. The exhibition was done very well.

Less pubs and night clubs. Baker & Wigtalls shouldn't be restaurants. Nice tea rooms. Doncaster Council pulls down

Old Doncaster changing very fast - just wondering when they'll change Mansion House. Well they have - those things

What you've got you should look after the Mansion House is dirty and neglected. Shop shutters kill the streets at night.

www.doncaster.gov.uk/planning
